

Introducing the next generation of innovative mobile device-PC services.

Security

With the power to remotely locate, shut down, lock, wipe, encrypt/decrypt and install certificates on your mobile device from any computer, your data will never be vulnerable again.

Services

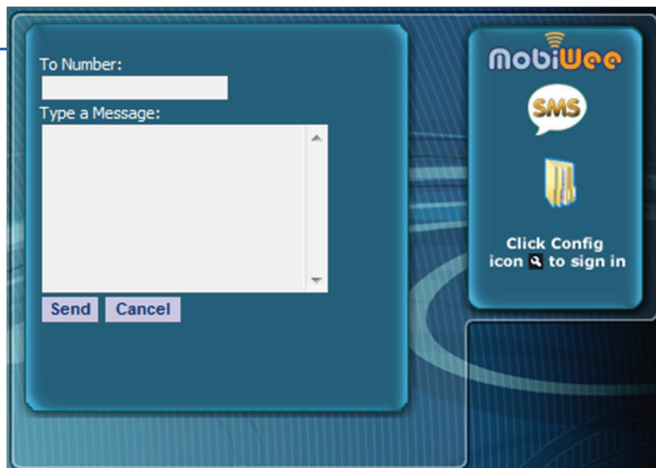

A powerful suite of services make it easier than ever to manage and customize your mobile device. SMS messages, files, contacts, mobile applications, and screen shots are available over the air *in real time* from any computer. Calls are remotely forwarded from your mobile device to any phone, so you never miss another important call.

Professional Services

Hundreds of customized configurations & solutions available for your employees' needs including custom authentication based on web, SMS & mobile technologies. Wifi, Bluetooth, and VOIP configuration also available— be sure to ask how MobiWee can work for you.

SMS Gadget

- Gives you real-time notification of incoming calls, missed calls, and voice messages, all with a current screenshot.
- Allows you to send and receive any SMS messages, files, or multimedia from your mobile device, PC, or Laptop.

Security:

Locate My Device

Whether on the bus, at the airport, or simply left at work, with the mobile device location service, you're never left guessing. If your mobile device is out of range, MobiWee location services will keep trying until it finds it.

Encrypt/Decrypt

Ensure your sensitive information is protected against data breaches. MobiWee ensures that your data is safeguarded, on and off your corporate network.

Lock/Wipe

Defend yourself against identity theft with the remote lock/wipe service, no matter where you left your phone. Just click to lock or reset your device and external memory to factory settings- from any computer.

Export/Install Certificate

Take the work out of security while securing your work by exporting and installing certificates remotely from any PC. With MobiWee, your identity is verified every time, from mobile device to any PC.

Shutdown/Restart

Ensure your privacy and conserve battery power by shutting down or restarting your mobile device remotely from any computer. Your delay just got a little less inconvenient.

Mobilized Services:

Manage Contacts:

- Remotely backup, restore, delete or add a new contact to your device from any computer
- Transfer your contacts when you upgrade or lose your phone

File Manager:

Manage, transfer files from any computer to your mobile device and back. File manager reads and displays all files and folders, making it easy to add, remove, backup, and restore your documents, files, music, ringtones, or videos.

SMS Manager:

- Send and receive SMS Message from the comfort of your PC
- Copy, paste, and publish messages to one or more contacts
- Bad reception and connectivity issues are a thing of the past; just set your phone down anywhere to receive messages OTA.
- Overcome the 160 character limit

Exchange, POP/IMAP email:

Automatically set up your exchange server, POP3 and IMAP on your device OTA, from the comfort of your computer.

Call Forwarding:

Left your mobile device at home or at the office? Call forwarding allows you to redirect your mobile device to any telephone number from any PC - never miss another important call!

Application Manager:

- Remotely install any mobile device application from the web or any Computer.

Simplicity at work:
